

## Disable User Account Control (UAC) the Easy Way on Vista...

This is an easy method that you can use to disable this annoyance from the Vista Control Panel interface. UAC is VERY ANNOYING to an experienced computer user.

**Note: Disabling UAC will lead to a less secure system, so be warned.**

Open up Control Panel, and type in "UAC" into the search box. You'll see a link for "Turn User Account Control (UAC) on or off":

On the next screen you should uncheck the box for "Use User Account Control (UAC)", and then click on the OK button.

You'll need to reboot your computer before the changes take effect, but you should be all done with annoying prompts. BooYah!!
